Imp rtance: High

- 1. Please search polypeptide of SE SEQ NO: 1 (open) against commercial and interference database.
- 2. Also please do oligopeptide search of SEQ ID NO: 1 against commercial and interference database.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 protein
            Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          DB DB

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Title: Perfect score: Sequence: 1 MAAPMNGQVCVVTGASRGIG.....YLPSFLRVPKWIIALYTSKF 313 US-10-006-163-1 313

Scoring table: OLIGO Gapop 60.0 , Gapext 60.0

105224 seqs, 38719550 residues

Word size : Searched: 0

Total number of hits satisfying chosen parameters:

105224

Minimum DB seq length: 0
Maximum DB seq length: 2000000000

Post-processing: Listing first 45 summaries

SwissProt\_40:\*

Database :

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

*Isolation of Vibrio harveyi acyl carrier protein; ";
and fabf genes involved in fatty acid biosynthesis; ";
J. Bacteriol. 178:571-573(1996).
-I- CATALYTIC ACTIVITY: (3R)-3-hydroxyacyl-[acyl-carrier protein]
NADP(+) = 3-oxoacyl-[acyl-carrier protein] +.NADPH.
-I- PATHWAY: FIRST REDUCTION STEP IN THE FATTY ACID BIOSYNTHESIS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ACT_SITE
